Military Connected Schools

The workshop for those who are planning to attend college is critical to the planning process because they missed a deadline or failed to provide all necessary emotional and social assistance for our military students.

Knowing where military students are will give schools better information than they have. By adding this question to the California Healthy Kids Survey (CHKS) military student question, schools will be able to have better data on the proportion of military students who are eligible for assistance.

The Military Student Question will be added to the CHKS, which is given to high school students each year. The survey includes the California School Climate Survey for students and staff, the California Healthy Kids Survey (CHKS) for students, the California School Parent Survey, and the California Parent and Teacher Survey.

If appropriate accommodations, however, are not available, the student will be unable to participate.

The California School Climate Survey for students and staff will include a question on the military student survey. The California School Parent Survey will include questions on the military student survey.

The question to the California Healthy Kids Survey will include the military student survey.

The California Healthy Kids Survey will give schools better information about their students who are military dependents and how they are doing.

The California Parent and Teacher Survey will include questions on the military student survey.
